

My Village

3,000 people live in my village. My village is 2 miles from Elbasan. It is in the east of Albania. In my village there are clothes shops, pizza restaurants and a library. The main industries in my town are farming and metallurgy. There are nurseries, a primary school, and a secondary school. There is a university and a college in the city. In my village the weather is nice and the food is so fresh. I have lived in London for 1 year now but I miss my town very much. I hope to see my family and friends. I want to see my teachers and my best friends.
