

My Town

The name of my town is Lembar. It is big town with a large population. It is near the capital city called Kinshasa. In my town we have many govement schools and some private schools where there are many activities. In the summer a lot of people visit my town because it is a nice town and they like to play in the sea. The town has three national schools and five universities. We have nice markets everywhere. There are many nice restaurants in the town and most people like to go there. We have got one stadium for football and we also have places to play basketball and tennis. In my area we like to go to swimming every Saturday.
