I am writing about my country. The name of the capital is Tehran. Tehran is a very big city and a lot of people live there.

I come from Bookan, a big city in the east of Iran. The population of Bookan is 500,000 Bookan is very far (20 hrs) from Tehran. In the west there is a big river, the River Sarok. In the south there are mountains. The most expensive area to live in is the centre. The cheapest area to live in is outside the city. I lived in Mirava. The main industry in my city is shops, factories and farming. There are primary and secondary schools and a college in Bookan. I went to Shanas School. It was a nice School. In my area there are some shops and a supermarket. There is a cinema, but there are no swimming pools.
