

Pomezia

This is the picture of where I used to live. The place is called Pomezia. It is an industrial area. The size is 110 square km and it has 40,000 inhabitants.

It is not too far from the capital city just 30 minutes by bus. But the buses usually arrive very late and are not so comfortable.

It is a quite good place to live because of its position, which is very close to the seaside, and there are many good shops in centre and sports facilities there are also very good.

Unfortunately it is not a green city and there is not very much for young people to do.
