

### **Rokiskis**

This is a picture of my town Rokiskis. This is a big town in the North East of Lithuania. The population of my town is about 100.000 people. The town is about 100 km from the capital city. It is surrounded by farmland, forests, rivers and lakes. It's a nice place to live.

The most expensive area to live in is the centre of town. I used to live not very close to the centre, so it wasn't very expensive.

The main industry in the town is the cheese factory and the factory of agricultural machines. Lots of people work in those factories. There are few secondary schools in the area I used to live in. Near to my home are several supermarkets such as a Media and Maxima. There is a market in the town, but it is held only twice a week

The most popular sport in Lithuania is basketball. In Rokiskis it is popular too. My town is located near to the border with Latvia. It's just about 30 miles away.
